- **Joule Studio Developer** — C_JSD_2610 (Nov 2026) · all certifications verifiable on Credly

PROFESSIONAL EXPERIENCE

Systems & IT Infrastructure Analyst | ERP Development & Technology Projects

São Paulo State Military Police · Dec 2003 – Present

- Role-based access profile and permission management for 500+ employees.
- Infrastructure support and administration: about 120 networked computers, servers, storage and the unit's network.
- End-to-end project follow-up: requirements and contract analysis, development, rollout, adjustments and delivery.
- Work with the logistics department to analyze and optimize materials, inventory and fleet routines.
- **SGA (2022 – present):** led the implementation of the administrative management system (procurement and finance), built by a contracted vendor: requirements gathering, key user coordination and post-go-live training. Expanded in August 2026 to the entire State Highway Police, about 25 units.
- **PPRI – Smart Highway Police Program (2018 – present):** requirements analysis, screen design, staging testing and user training. Digitized a process previously handled through Excel spreadsheets sent by email.
- **BOe (2017 – 2018):** requirements analysis, testing, support and on-site user training. Military Police mobile app and web system with 50,000+ users, still in operation.
- **BOATRv (2012 – 2017):** prototyping, requirements analysis, testing and post-implementation support. First electronic incident reporting system of the State Highway Police, around 5,000 users.

Creator & Developer – 5BPRv ERP

Self-initiated project · Jul 2025 – Present · Live in production since October 2026

- Single-handedly designed and built an institutional ERP with 8 modules and 20+ business entities, from requirements analysis to production go-live.
- Logistics, fleet, materials, inventory, personnel and reporting modules, with movement traceability and audit trail.
- Role-based access control (RBAC); PDF generation and Excel export with institutional layout.
- Stack: Python · FastAPI · PostgreSQL · SQLAlchemy · React · Vite · MUI · REST API · JWT.
- Custom ERP built outside the SAP platform; materials, inventory and fleet processes apply SAP MM and MDG principles.

SAP S/4HANA MM Hands-on Practice – Sourcing & Procurement

Cromos IT (training environment) · Jan 2026 – Present

- Procure-to-Pay: purchase requisition, RFQ, purchase order, goods receipt and invoice verification (MIRO).
- Master data: materials, suppliers (Business Partner), purchasing info records and source lists.
- Inventory management: movement types, stock transfers and physical inventory.
- SAP GUI and SAP Fiori; Clean Core principles.
